## PROFILE

I am a dynamic and creative Web Designer with a diverse skill set that bridges web development, graphic design, and advanced IT expertise. I specialize in crafting engaging and functional websites while exploring emerging technologies like game development and 3D modeling to bring unique ideas to life.

## PROJECTS

### Blood Bank Donor Management System

- The Blood Management System is a comprehensive web-based platform developed as a final-year college project. It is designed to streamline the process of connecting blood donors, recipients, and healthcare professionals.
- Built using Laravel for back-end functionality and Bootstrap for responsive front-end design.
- Chatbot provides quick assistance and enhances user interaction.

### Blog Application

- The blog offers step-by-step guides on topics such as "How to make money blogging," covering various monetization strategies suitable for different types of bloggers.
- Built with a responsive layout, the website ensures optimal viewing experiences across various devices, enhancing user engagement.
- Built using HTML, CSS, JavaScript and Tailwind

### Weather Application

- The Weather Web Application is a dynamic and user-friendly platform designed to provide accurate and real-time weather updates for users.
- Fetches up-to-date weather conditions, including temperature, humidity, and wind speed.
- Build using React.js, Tailwind, API, Git
